Subject: Beneficial Use Exam for WR 22-7786

Shelley,

Teton Creek Resort LLC ("TCR") filed proof of beneficial use in November 2008 for WR 22-7786. TCR is now defunct and no longer in operation. As part of a 2007 development agreement with the City of Driggs, TCR was to provide title to the WR in exchange for the City distributing the water through its system works to the lots in the development. The water has been distributed through the City distribution works since 2007 in accordance with the agreement. Many of the documents involved this transaction are available online in the Department's files.

Rocky Mountain Environmental ("RME") is trying to help the City with acquiring ownership of the WR Permit, but have been unsuccessful to date because RME has been unable to locate an authorized agent from TCR to execute the assignment. The City needs to settle this ownership question in order to go forward with other issues and has requested that IDWR expedite licensing of the WR. Kristen Moore at RME is the contact her number is 524=2353.

Thanks,

John
