Hi Nick,

Here are photos of the water meter and lockable structures that were installed as part of the conditions set forth from IDWR's field inspection pertaining to the Lee Creek Permit #74-7250B. I hope the improvements meet IDWR's approval so that we can shore the permit up into a legal water right and continue formalizing other desirable water right transactions associated with "points of diversion" and permissible areas of use on the Cottom Ranch.

Thanks again for all of your help with this Nick.

Best regards,

Ron
