Re: Permit No. 63-33022 (Well No. 16) - City of Nampa
Beneficial Use Field Report and Proof of Beneficial Use

Dear John:

Enclosed on behalf of the City of Nampa, please find a Beneficial Use Field Report and Statement of Completion for Submitting Proof of Beneficial Use for Permit 63-33022. Permit 63-33022 is a municipal permit for Reasonably Anticipated Future Needs (RAFN).

This submittal follows several recent RAFN actions by the City. In June 16, 2010, the City submitted letters seeking RAFN licensing of 63-12474 (Well #11) and 63-12506 (Coventry Place). On August 2, 2010, the City submitted a beneficial use field report for 63-31243 (Belmont Heights) also seeking RAFN licensing. Licensing of each of these is now pending before the Department. The City has not yet prepared a beneficial use field report for 63-32835 (Coyote Springs), another RAFN permit.

With regard to the City's RAFN actions, please note the following.

- The City is currently authorized to divert 56.05 cfs from ground water for potable municipal use (including the as-yet undeveloped permit 63-32835).
- The City's current or projected installed system capacity is 57.25 cfs. (This assumes the well developed under permit 63-32835 will deliver the 5 cfs permitted.)
- The City will require a peak instantaneous flow of 58.38 cfs to meet municipal demand for potable water (that is, non-irrigation uses including fire) by the year 2030.

Licensing of permit 63-33022 for the full 4.5 cfs diversion rate is an important step toward meeting the anticipated year 2030 municipal demands within the City of Nampa.

Please contact Roxanne Brown, Chris Meyer, or me with any questions or comments. We look forward to your response.

Sincerely,

A handwritten signature in blue ink, reading "Terry M. Scanlan".
