Re Licensing of Permits for the Northside Blvd. (Permit Nos. 63- 31660 and 63-31785) and the Lansing Ln. (Permit Nos. 63-31659 and 63-31786)
LDS Churches

Dear Mr. Oldham:

This correspondence is regarding the additional information the permit holder must furnish IDWR before the licenses can be issued for the permits referenced above. Idaho statutes required that IDWR verify the extent of beneficial use of water before a license can be issued. Methods used to verify use can be measurements taken on-site with the diversion and delivery system on or theoretical calculations using pump and motor specs (pump curves, operating psi, hp), records that the permit holder maintains for the water systems and pump or tests that the permit holder may have conducted (static water level and drawdown, operating psi readings, gpm readings).

As you know, you were not able to provide information about the systems at the Northside Blvd. and Lansing Lane systems on March 7, 2012, the day of the field exams. Here are some suggestions about where to get the information for each system so that IDWR can calculate the diversion rate of each well and the domestic volume:

- American Geotechnics assisted the Church in filing the applications. They may have information regarding the installed systems;
- Records of the annual fire protection tests;
- Records of domestic well tests;
- The LDS Salt Lake City office, Real Estate Division;
- Burgess Pump or other pump company referenced in your records;
- The Northside Church - Robert Buchanan of the Eagle FM group was named to accompany IDWR on the field exam. Perhaps the Eagle FM Group has information; and,

Mr. Steven Oldham

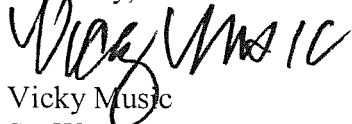

March 22, 2012

Page 2 of 2

- The number of church members of each church or maximum number of people in the church at a give time; the number of days services or classes are held and the number of attendees.

The required documentation is due by April 22, 2012. Failure to provide the required information may result in the permits being voided. If you need an extension of time to gather the information, please contact me. Thank you for your attention to this matter.

Sincerely,

Vicky Music

Sr. Water Resource Agent
