Re: Willowtree Estates Amendment to Water Rights #63-31877

Dear Mr. Lester,

Pursuant to the conversation that I had with Rob Whitney, attached is the original application for amendment of the water rights permit for Willowtree Estates. The original well for this subdivision did not meet water quality standards. Rather than treating the water from this well, it was decided to drill a second well. Originally the thought was to abandon the original well, but after careful consideration it was decided that the original well could be used as a backup for emergency use only. This amendment is needed to clear up the confusion from not abandoning the original well; and add the second well to the water rights.

Rob suggested that we request a field exam to be performed as soon as possible in conjunction with the amendment to the water right licensing.

It appears that the location for the water right for these wells is incorrect as both wells are located in the same NE NW of section 28, Township 3N, Range 1W, B.M. During this process, please amend the license to correct this location.

Should you have any questions or need any additional information, please do not hesitate to contact me. Thank you in advance for your assistance with this matter.
