There is a **FILING FEE of \$50.00** to be included with this form when filed with IDWR.

Describe what work has been completed toward the development of this water right:

If no work has been completed, show "none".

The infrastructure for the entire project has been completed. This includes the distribution lines, pump/well house, and well. A geological analysis is currently being conducted to find a more suitable site for the new well.

Costing \$1,500,000

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

DEQ has required a second well & pump because the flow from the first well was insufficient for the number of lots in the subdivision. Test wells have been drilled but have produced an inadequate flow to meet DEQ requirements. Another test well needs to be drilled and adequate flow developed before proof of beneficial use is submitted.

Permit holder(s) request an extension to May 31, 2017

Signature (If other than permit holder, Power of Attorney must be supplied)
