RE: Licensing Review Memo + DEQ Map

Timeline:

Application Received: May 17, 1993

Permit Issued: March 21, 1994

Proof of Beneficial Use: May 12, 1995

Field Examination: August 6, 1996

Point of Diversion: There is one well associated with this right, Well #4 of the city of Council. The well was completed in 1994 and is located within the SESW of Section 11, 16N, 1W. Even though the field examiner designated the well in the SWSW of Section 11, I was able to confirm the location of the well house by aerial imagery and DEQ's GPS'd point.

Overlap Analysis of PD: There are no other rights that are diverted from this PD. The field examiner made the comment that 67-2152 and this right are diverted from the same PD; however, 67-2152 is from a surface water source, is for domestic use, and has a priority that pre-dates the well that was drilled under this right. Water right 67-2152 DOES NOT divert from the same PD as this right.

POU: The place of use is the service area for the city of Council. There was a boundary that was associated with city right 67-7120 and I associated this right's POU with that shape.

Overlap Analysis of POU: The rights that belong to the city of Council's water right portfolio are:

Basin	Sequence	Process	Basis	Status	Draft	Priority Date	Diversion Rate	Source List	Water Use List	Current Owner
67	7120	Water Right	Decreed	Active	N	12/15/1972	0.80	GROUND WATER	MUNICIPAL	CITY OF COUNCIL
67	7924	Water Right	License	Active	Y	6/27/1993	0.36	GROUND WATER	MUNICIPAL	CITY OF COUNCIL
67	8040	Water Right	License	Active	N	9/20/1999	0.05	GROUND WATER	MUNICIPAL	CITY OF COUNCIL

Volume and Diversion Rate: The field examiner has provided a solid measurement of the PD. This right will be licensed with 0.36 cfs and no volume as recommended by the field examiner.

Amendment?: Yes, the legal description for the PD should be amended.
