Re: Amended WSB Rental Application for Lee Sutton

On 5/16/2012 I spoke with Rob Harris, who represents Lee Sutton. We discussed the map submitted with the amended rental application. There was a little ambiguity regarding the shape representing the rental acres compared to the land list on page one of the rental app. The shape represents the total irrigation Lee intends to put into use. Rob will be submitting a transfer to rearrange acreage under a number of rights to match actual irrigation. The rental application covers a remaining balance of acreage the transfer will not accomplish (as I understand in talking with Rob). The NENW, NWNE, NENE, SENW, and a portion of the SWNE of Sec 3 T4N R40E will be covered with the rental application. 46 acres of the 87 acres listed on the rental app will be authorized for irrigation. Note 69.5 acres needed to be rented to offset depletions in the ESPA.
