2. Rights 45-597, 45-622B, 45-674, 45-14219, 45-14221, 45-14223, 45-14386, 45-14388, 45-14390 and 45-14392 when combined shall not exceed the irrigation of 793 acres.
3. Rights 45-597, 45-622B, 45-674, 45-14219, 45-14221, 45-14223, 45-14378, 45-14380, 45-14382, and 45-14384 when combined shall not exceed a total diversion rate of 19.94 cfs.
4. Rights 45-597, 45-622B, 45-674, 45-14219, 45-14221, 45-14223, 45-14378, 45-14380, 45-14382, 45-14384, 45-14386, 45-14388, 45-14390 and 45-14392 when combined shall not exceed a total diversion rate of 27.94 cfs and the irrigation of 942 acres.
5. The rights in Transfer 77602 are limited to the irrigation of a specific 942.0 acres within the 1058.5 acre place of use authorized by Transfer 77602 in a single irrigation season. The specific 942.0 acres to be irrigated by the right holder are shown in the electronic shape file associated with the rights in the geographic information system component of the water rights database maintained by the department. Before changing the 942.0 acres to be irrigated within the 1058.5 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.
6. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 45A.
7. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.
8. Priority of appropriation shall give the better right as among those using the surface and ground waters of Mill Creek, Warm Springs, Spring Creek, Summit Creek, and their tributaries, and rights having the same priority date shall share equally in the available water supply in a manner that will equally apportion all natural channel losses among rights having the same date of priority. For example, if there are seven points of diversion from the natural channel, which have the same 1879 date of priority, and the flow in the stream is equal to one-half of the amount of flow necessary to fully satisfy all of the 1879 priorities at their respective points of diversion, then the diversion rates at each of the seven points of diversion shall be reduced by one-half. A pro rata sharing of the water in the stream shall continue to be enforced among rights of equal 1879 priority until the watermaster shall have determined that water in the stream is inadequate to reach a downstream 1879 point of diversion in a sufficient quantity to be applied to beneficial use. Thereafter, upstream 1879 appropriators who are still able to receive water in a sufficient quantity to be applied to beneficial use shall continue a pro rata sharing of the water in the stream.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
10. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.

WATER RIGHT NO. 45-597
As Modified by Transfer No. 77602

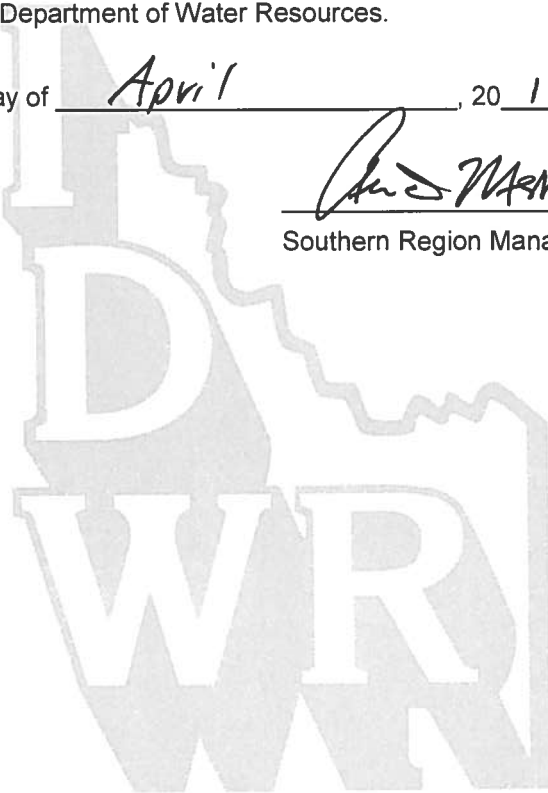

11. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
12. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

1. This right is limited to the irrigation of 74.9 acres within the authorized place of use in a single irrigation season.
2. Rights 45-14378, 45-14380, and 45-14382 when combined shall not exceed the irrigation of 109 acres.
3. Rights 45-597, 45-622B, 45-674, 45-14219, 45-14221, 45-14223, 45-14378, 45-14380, 45-14382, and 45-14384 when combined shall not exceed a total diversion rate of 19.94 cfs.
4. Rights 45-597, 45-622B, 45-674, 45-14219, 45-14221, 45-14223, 45-14378, 45-14380, 45-14382, 45-14384, 45-14386, 45-14388, 45-14390 and 45-14392 when combined shall not exceed a total diversion rate of 27.94 cfs and the irrigation of 942 acres.
5. The rights in Transfer 77602 are limited to the irrigation of a specific 942.0 acres within the 1058.5 acre place of use authorized by Transfer 77602 in a single irrigation season. The specific 942.0 acres to be irrigated by the right holder are shown in the electronic shape file associated with the rights in the geographic information system component of the water rights database maintained by the department. Before changing the 942.0 acres to be irrigated within the 1058.5 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.
6. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 45A.
7. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.
8. Priority of appropriation shall give the better right as among those using the surface and ground waters of Mill Creek, Warm Springs, Spring Creek, Summit Creek, and their tributaries, and rights having the same priority date shall share equally in the available water supply in a manner that will equally apportion all natural channel losses among rights having the same date of priority. For example, if there are seven points of diversion from the natural channel, which have the same 1879 date of priority, and the flow in the stream is equal to one-half of the amount of flow necessary to fully satisfy all of the 1879 priorities at their respective points of diversion, then the diversion rates at each of the seven points of diversion shall be reduced by one-half. A pro rata sharing of the water in the stream shall continue to be enforced among rights of equal 1879 priority until the watermaster shall have determined that water in the stream is inadequate to reach a downstream 1879 point of diversion in a sufficient quantity to be applied to beneficial use. Thereafter, upstream 1879 appropriators who are still able to receive water in a sufficient quantity to be applied to beneficial use shall continue a pro rata sharing of the water in the stream.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
10. This right is a split from former right 45-41.

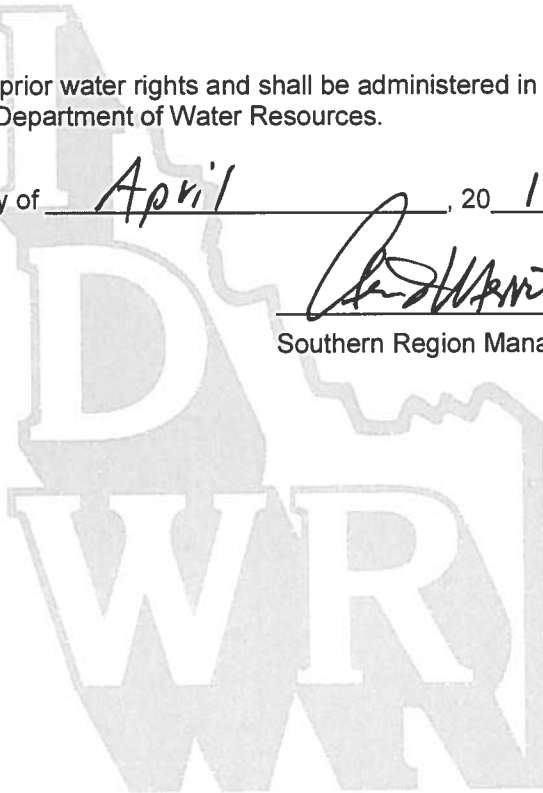

WATER RIGHT NO. 45-14378
As Modified by Transfer No. 77602

11. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
12. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
13. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

A pro rata sharing of the water in the stream shall continue to be enforced among rights of equal 1879 priority until the watermaster shall have determined that water in the stream is inadequate to reach a downstream 1879 point of diversion in a sufficient quantity to be applied to beneficial use. Thereafter, upstream 1879 appropriators who are still able to receive water in a sufficient quantity to be applied to beneficial use shall continue a pro rata sharing of the water in the stream.
