5. General Information:

a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future: Six existing wells, a series of booster pumps, regulating ponds, and a pipeline/ditch system will distribute water to the entire farm via pivots, hand lines, and wheel lines.
The proposed wells and cross-connects will stabilize the water supply and ensure that the authorized amount of water can be pumped. In-line measuring devices can be installed in the straight sections of the pump discharge lines.

b. Who owns the property at the point(s) of diversion? Applicant
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system: _____

c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☐ Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: NO

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer: The farm will have the flexibility to use water from any well on the property, on any field in the property, which improves farm management. The number of acres irrigated will be limited to the licensed amount.

e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use: _____

f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Narrative on the Application for Transfer

This Application for Transfer seeks to group the water rights into a permissible place of use (PPU) and to add ~~three~~ points of diversion (POD).

FOUR

PPU

Cross-connects are anticipated to commingle water across the entire farm. A goal of the transfer is to provide management flexibility.

POD

Well #1 (attachment #7a) has had problems of pumping sand and low production. Through a replacement well permit a New Well was drilled in the NE SE Sec 23. The production of the New Well was not sufficient to fully replace Well #1, so Well #1 will not be abandoned. The New Well was not connected for use and is waiting for the subject application for transfer to be approved. This application seeks to add a POD to account for the New Well.

THREE
This application also seeks ~~two~~ Proposed Wells as a precaution against future well production problems. One proposed well is in the NWSW Sec 23 and the other is in the SE SW Sec 22. THE ADDITIONAL WELL IN SE SW SEC 23 WILL BE COMPLETED IN THE BROWN CLAY TO AUGMENT THE LOW PRODUCING WELL #8.
