Re: Changing to Municipal Purpose of use

In order to recommend the purpose of use as Municipal, we need verification that North Lake recreational Sewer and Water District is a municipal provider.

On the DEQ website, I was able to find documentation that North Lake recreational Sewer and Water District are considered a municipal provider:

**IDAHO** Department of
Environmental Quality

North Lake Recreational Sewer and Water District receives wastewater grant

Friday, June 01, 2001

BOISE — The Idaho Department of Environmental Quality (DEQ) today announced the award of a \$45,000 state wastewater grant to the North Lake Recreational Sewer and Water District on the north shore of Lake Cascade in Valley County.

The funds will be used to conduct engineering to expand the existing wastewater collection system in the district to homes currently using septic drainfield systems.

The purpose of the project is to eliminate a number of on-site wastewater disposal systems that could contaminate surface and ground water.

DEQ is authorized by state law to provide grants to assist municipalities in improving their wastewater treatment facilities.

The total eligible cost of the project is \$90,000. The remaining \$45,000 will be paid by the District.

In addition, license 65-22358 was issued for municipal use on May 5, 2004, in the name of North Lake recreational Sewer and Water District
