CONDITIONS OF APPROVAL

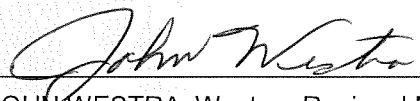

1. Proof of application of water to beneficial use shall be submitted on or before **May 01, 2013**.
2. Subject to all prior water rights.
3. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
4. Stockwater use is for 50 range cattle.
5. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.

State of Idaho
Department of Water Resources
Permit to Appropriate Water

NO. 63-33626

6. For each irrigation season, diversion and use of water under this right shall either be supplemental to the diversion and use of surface water to irrigate the place of use, or it shall be the sole, primary source of water to irrigate the place of use, depending on specific crop requirements. The right holder shall keep records to justify primary or supplemental use of water pursuant to this water right for each irrigation season. The right holder shall provide the records to the Department upon notification.
7. When this right is used for supplemental irrigation, the right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. In those circumstances, the right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
8. The right holder shall pay all assessments levied by Farmers Union Ditch Company to maintain the right to receive surface water to irrigate the place of use authorized for this right.
9. If the surface water right(s) appurtenant to the place of use is abandoned, forfeited, sold, transferred, leased or used on any other place of use, this right to divert ground water shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
10. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the place of use.
11. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 8th day of May, 2012.

JOHN WESTRA, Western Regional Manager
