Hi Kathy,

Here are the questions that I have:

- (1) What is the horsepower of the submersible pump in the well? 3 hp
- (2) Do you know what make, model or serial number the pump is? Wood River has information

(3) Do you know what size discharge is coming off of the well? Wood River has the information

(4) What size and type of pipe goes from the well to the shop, 5th wheel, and greenhouses?

Pipe size to the 5th wheel and the greenhouses is 1 ½ "

(5) Do you happen to have the well drillers log for the well, or know what the depth of the well, and static level is in the well?

Please return the information by 5/2/2012, so I can complete the licensing process.

Thanks you again for taking me out to the greenhouses and showing me around, I really appreciate it. I look forward to hearing from you.
