Hi Cherie

I have some INFO for you on 95-9395

- 1) POD is at w 116 47" 33.3' N 47 41" 43.4'
- 2) Irrigation is with this well D0055427 for 5ac.
- 3) The well is set up as a backup system and is tested for water quality every 4 to 6 weeks.

Please see photos. Have a good day.

I will set this up. The exam will be done when the irrigation system is turned on. Have a great day.

Eric,

Thank you so much for taking this on. I started on the beneficial use field report and got as far as I could. We need some measurements on the system to verify the capacity. Also, if you could verify the irrigated area and location of the POD that would be great. Shelley wants to be sure that the irrigation water from the well was actually put to beneficial use since they have an alternate source of irrigation water (city water).

I enclosed the field report to this email for your information. I made some notes on there that might be helpful and I also enclosed a draft license.

Let me know if you have any questions about anything. I don't think we're in a big huge rush, but sometime this field exam season would be awesome.

Thanks again Eric for all your help.

Cherie

Hey Eric,

We have a HUGE favor to ask you. Cherie has been working on trying to license permit 95-9395. After running things past Shelley, it turns out there are some questions that can't be answered without doing a filed exam. We hate to bury this thing in the vault after Cherie has put so much energy into getting up to speed with the file.

Shelley suggested we contact you and see if there was any way someone could squeeze in a field exam one of these days?

Let me or Cherie know if you think that would work out. Cherie can probably best fill you in on what we know.

Thanks Eric,
Craig

Well Tag # D0055427
