Hey Corbin,
Thanks much for looking into this.

The permit was for 135 acres from what I can tell. The conditions limit irrigation to 135 acres. Dan's BUFR narrative makes this clear and lists 266.3 acre PPU, but the POU table on pg 1 misses these 30.

Craig's amendment doesn't include the 30 acres in the NWNW Section 16. It does include the other acres shown on the nice map prepared by Dan.

It looks to me that the acres missing from NWNW are just an inadvertent oversight. If Craig agrees, perhaps IDWR can made the adjustment and reissue the application for amendment.

Thanks again,
Scott

Scott

I spoke with Dan Nelson about this permit and his findings while doing the exam were 266.3 acres in the place of use but the permit was for 236.3. This is why Craig needed an amendment to include the additional 30 acres in the NWNW of section 16 not originally identified in the application for permit. So hopefully this helps identify or answer the question about these additional acres not being included as of today.

Thanks

Corbin
