Alfalfa reference ET (ET _r) computed by the ASCE standardized Penman-Monteith method using solar radiation and dewpoint estimated from air temperature and wind speed from long term regional stations.										
Actual ET (ET _a) includes soil surface evaporation (from precipitation and irrigation) as well as reductions in evapotranspiration caused by soil water shortage. It is often below Potential ET for rainfed crops. (ET _a = K _s *ET _b + K _e *ET _r)										
Potential ET (ET _p) represents the total estimated evaporation that would occur without soil moisture stress. It includes soil surface evaporation from recorded precipitation and simulated irrigation. (ET _p = ET _b + K _e *ET _r)										
Precipitation deficit (Pdef) or irrigation water requirement is the difference between ET and the precipitation stored in the root zone and evaporation layer (Przel). During the growing season for irrigated landcovers Pdef = ET _a - Przel and for nonirrigat										
Precipitation residing in root zone is the amount of gross precipitation that infiltrates (less surface runoff) and remains in the root zone for evaporation and transpiration (less deep percolation). (Przel = P - Runoff - DPerc)										
Effective precipitation for transpiration is the amount of Przel for use in supplying transpiration by the crop or land use cover. It does not include infiltrated precipitation that is evaporated from the soil evaporation layer. (2007 version).										
-NA- indicates that data was missing preventing computation of reference evapotranspiration. For monthly series, it indicates that air temperature data was missing for the entire month. For annual series it indicates that 15 (6) days or more were missing

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

MEMORANDUM

Date: March 19, 2012
To: Transfer 77522 File
From: Benny Walker
Re: Evaluation of Sufficiency of Information Submitted

Application proposes transferring a 3 acre portion (0.06 cfs) of right 36-8054, an irrigation groundwater right from a farm located approximately 4.0 – 4.5 miles north and 3.0 – 3.5 miles west of the center of Jerome to 3 acres of irrigation associated with a home and landscaping at a CAFO facility located adjacent to the farm. The transferred portion of this right (36-16914 - 0.06 cfs) will be diverted from three existing wells and a new well to be drilled at the CAFO site. The wells involved with the transfer are located within adjacent model cells of the ESPA model area so a ground water model analysis is not required. Transfer occurs within the jurisdiction of Water District 130 therefore watermaster comments will be solicited.

Note that right 36-8054 was split up front into rights 36-16914 (3 acre portion in T77522), 36-16915 (68 acre portion in T77523) and 36-16916 (44 acre unchanged portion in T77425). Right 36-8054 is currently authorized to provide up to 115 acres of irrigation with a 217.8-acre permissible place of use (PPU), although a review of the imagery indicates the entire PPU is irrigated. According to a 2002 memorandum by Kay Walker, the 115 acres is considered primary and the applicant brought 100 shares of North Side Canal Company (NSCC) water to cover the remaining acreage.

- **Authority to File:**
The applicant submitted quitclaim deeds for all properties involved with the transfer showing that the applicant owns the right and the property involved with the application. The signatory of the application is listed with the Secretary of State Business Entities for Millenkamp Properties, LLC. A letter from the current lien holder, Northwest Farm Credit, consenting to the proposed changes was also submitted.
- **Water Right Validity:**
Right 36-16914 was licensed 1/11/2002. Recent aerial photos of the area show the farm to be currently irrigated. A 2010 FSA report submitted with the application indicates the acres to be dried up were irrigated so forfeiture should not be an issue.
- **Injury to Other Water Rights:**
None anticipated. The right is within WD130 so measurement and reporting is required and the rights will be under the jurisdiction of the water master of that district.
- **Enlargement of Use:**
None anticipated with proper conditioning and the measuring and reporting requirements.
- **Local Public Interest:**
Application will be subject to public notice and protest.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as beneficial uses of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Dear Mr. Funderburg:

Our office is currently processing two water right transfer applications that you submitted on behalf of William J. and Susan Millenkamp. The first transfer proposes converting a 71.0 acre portion of an irrigation right (36-8054) to stockwater and commercial use. The second transfer proposes transferring a 3.0 acre portion of the same right to irrigate around a home and berms. During my review of these applications there are a couple of items discovered that need to be addressed in order for the Department to continue processing the applications...

Additional water rights: During my research of water rights for the properties of the CAFO I discovered a water right (36-14152) in the Name of William and Judith Braun that appears to belong to Millenkamp Properties, LLC. I have drafted a change to add the stockwater portion of this water right to the CAFO facility and the domestic portion to the home. Enclosed is a new form describing the changes and a map showing the proposed place of use for the domestic water right. I need signatures and dates approving the changes on both the new form and the map. Also I found a domestic water right (36-14536) in the name of Lon A. and Nancy Thompson associated with a home on the Northwest side of the CAFO. I have included an ownership change to change this water right into the name of Millenkamp Properties, LLC. In addition a \$50.00 fee is required to change both these water rights (36-14152 and 36-14536) into the name of Millenkamp Properties, LLC.

Deeds: The deeds submitted with the applications excludes the area of the home where 1.5 acres of irrigation is proposed to be transferred. A deed for the home is needed to be able to transfer the 1.5 acres of irrigation for the area around the home. In addition if the deed for the home is in a name other than Millenkamp Properties, LLC we need a statement from the deeded owners allowing Millenkamp Properties, LLC to place their water right on the area surrounding the home and that Millenkamp Properties would retain ownership of the water right.

Sincerely,

Benny Walker
