

MEMORANDUM

TO: Water Right File 37-4332
FROM: Monica Van Bussum
DATE: April 9, 2012
SUBJECT: Robert Baker Water Supply Bank Rental Application

We have previously processed this rental. Please see my memo dated August 13, 2010, for additional information. In the past, we were only able to satisfy 1 acre of Baker's request. Per discussion with Allen Merritt at IDWR's Southern Regional Office, we have been able to satisfy 2 acres of the request for this rental term. Please see the attached email from Allen for more information.

Subject: RE: Basin 37 Baker rental

Probably no big deal in moving GW upstream with the additional right since the first one does the same thing. If they were going to transfer permanently there may be issues with the minimum flow rights during dry years in the late summer but all these issues likely to go away when a call is made on all these GW rights.

Subject: Basin 37 Baker rental

Hi Allen,

I have a rental application from Robert Baker in Basin 37. He's rented from us before and has always applied for 3.7 acres but we've only ever had 1 acre to rent to him. However, this year we may have enough to rent 2 acres to him. Here's what I've got.

The proposed rental POU: 3.7 acres in T05N R17E 26 (2.7 in NENE and 1.0 in SENE). The POD is a well in T05N R17E S26 NENE.

The proposed leased rights to satisfy this rental request:

37-2627D – 1 acre available to rent. Water right POD in T03N R18E S16 NESW.

37-4332 – 1 acre available to rent. Water right POD in T04N R17E S13 SESE.

We've rented Baker only the 37-4332 right in the past but I'm wondering if we can get him an additional acre under 37-2627D. What do you think?

Monica
