Attachments: Approved Permit 63-33587.pdf

John,

Thank you for processing permit 63-33587 for additional irrigation, flow rate and a new well at the Boise Temple site. Attached is the draft permit approval that we recently received. The permit elements are consistent with the application we submitted, however Condition No. 4 limits combined diversion rate to 0.03 cfs/acre. We requested a total flow rate of 0.12 cfs to allow a combined diversion rate of 0.04 cfs/acre based on the following: 0.06 cfs for 1.5 new acres and 0.06 cfs additional water for 3.2 acres overlapped by water right 63-10142 at 0.022 cfs/acre. Because 0.12 cfs was approved, I'm wondering if the 0.03 cfs/acre listed in Condition No. 4 is a typo.

Thank you for your attention to this matter John.
