DEPT. OF WATER RESOURCES
SOUTHERN REGION

On February 21, 2012 a water right transfer was submitted to the Idaho Department of Water Resources (IDWR) by Brian and Sandy Pittock, Scott and Holly Giltner and Luke and Tani McCoy regarding water right 36-2146. Water right 36-2146 is an irrigation water right that provides irrigation water to 199.0 acres of farm ground. This water right has a 1951 priority date and is decreed in the Snake River Basin Adjudication (SRBA) court.

The current well, that provides irrigation water for this right, is not able to supply the full amount of water under this water right to the 199.0 acres. The owners of the water right have decided to drill a new well instead of repairing the old well. See attached aerial map for the location of the current well and the new well.

Once the new well is drilled, the well driller will perform a pump test on the new well. This test will indicate how productive the new well will be. If the new well can supply sufficient irrigation water to the 199.0 acres the old well will be abandoned. If the new well cannot supply the sufficient amount of water for the 199.0 acres, then both wells will be utilized in combination to supply water to the 199.0 acres.

It is not lawful for the new well or a combined use of both wells to exceed the pumping requirements of water right 36-2146 for the 199.0 acres.

IDWR needs to know that the individuals, entities or parties that are located geographically close in proximity of the new well are aware of purpose and extent of the well and associated water right. IDWR has identified the Carlquist Brothers, R. Mathias Udy and James Ray Kincaid as individuals, entities or parties that need to understand the extent of the new well and give their consent to the well being drilled.

It is asked that you sign this letter and show IDWR that you understand the purpose of this new well and that Brian and Sandy Pittock, Scott and Holly Giltner and Luke and Tani McCoy have your consent, to drill this new well, to provide irrigation water to water right 36-2146.

Thank you,

JAMES RAY KINCAID
