Re: Lease Application for 45-2363

Dear Mrs. Van Bussum:

Howard and Karen Robinson desires to lease 45-2363 to the Idaho Water Supply Bank for a period of 5 years or until the water right is sold and transferred to a permanent location.

Water right 45-2363 is a supplemental water right to Oakley Canal shares. The Oakley Canal Company does not have a tiered share system. All shares within the canal company are of equal diversion amounts and annual volume.

The Oakley Canal shares have been utilized for more than six years to irrigate the POU covered by 45-2363. Water right 45-2363 has not been used because the primary Oakley Canal shares have been adequate to provide irrigation water. Therefore, forfeiture is not an issue with 45-2363.

Water right 45-2363 can only be rented from the Idaho Water Supply Bank or transferred to a location that is within the Oakley Canal Company service area. This will prevent an enlargement of 45-2363.

Correspondence with Monica Van Bussum, Allen Merritt and Pam Skaggs concerning the current POU of 45-2363 relative to the current pivot configuration and application of canal shares concluded that this water right can be leased to the Idaho Water Supply Bank or transferred without any further changes or alteration to 45-2363.

Sincerely,

Greg Sullivan, M.S., E.I.T.
