Re: Water Supply Bank Applications for Jentzsch-Kearl Farms- Garner Farm

Dear Monica,

Attached are two new WSB applications for water rights 36-2381A and 36-12043, appurtenant to the Garner Farm which Jentzsch Kearl Farms leases for irrigation purposes. These two WSB applications and calculated diversion rates, volumes and acre portions were generated based on a February 9<sup>th</sup> 2012 email request from Dan Nelson, in which he indicated the correct portions of each water right to identify for lease to the WSB. Because two amended WSB lease applications could not be secured within a 30 day time limit window identified by IDWR, Dan Nelson rejected the amended applications submitted by our office in late January of this year as outlined in a March 5<sup>th</sup> letter to the applicant.

Through recent correspondence with you, it is my understanding that all past information submitted on behalf of the applicant to IDWR dealing with these two water rights, along with these new applications with correct diversion rate, volume and acre apportionments, will allow processing by IDWR to proceed. Please copy our office on all correspondence regarding these water supply bank applications. Thank you for your assistance on this matter and if you have questions or comments, please don't hesitate to call.

Regards,

Zach Latham, M.S., Hydrologist
