Michelle:

I have forwarded a request to the engineer that designed the heat exchanger. Hope to hear back soon. When we receive the information and you finish your calculation we would like to compare it to our data. We have water reading for every week for the last 12 years and have a good idea on how much is domestic and how much is irrigation by looking at the shoulder months. I hope the engineer will respond this week. Thank you for your assistance.

Tim Cochran
Assistant Manager
Northern Lights
