Subject: Wildlife Projects table
Attachments: Bs 63 projects table.docx *

Attorneys & Consultant:

Yesterday I sent you an email with a table of approved permits and pending applications for wildlife projects around Parma. The table only covers this stack of recent (late 2004 & younger) proposals, not every wildlife right/claim in that entire area.

I found an error in the storage total for pending applications. Please use the attached table instead of the other one. I hope the new version is easier to digest with separate columns for cfs & af storage. Also, please remember some applications that do not formally list storage might include ponds that can fill in 24 hours under the rate of flow (cfs x 2 = af per day) and are interpreted as non-storage diversions. Sorry about the mix-up.

Steve Lester
Water Rights Supervisor

* Disregard table in 3/21/12 email, had error.
Use this corrected table (Attached) instead.
