Re: Farmers Union Ditch Company, Inc. / Water Right 63-123F

Dear Department representative:

I write as attorney for Farmers Union Ditch Company, Inc. (Farmers) regarding the above referenced water right owned by Lexington Hills, Inc. This water right is diverted from the Boise River at the diversion works operated by Farmers and is conveyed in the Farmers canal to a point of redirection near its decreed place of use. It has come to Farmers attention the owner of the water right Lexington Hills, Inc. is investigating or considering submitting a transfer application to change the point of diversion/place of use of the water right or desires to lease the water through the water bank.

The purpose of this letter is simply to request Farmers be notified of any submission to the Department by the owner of the water right seeking to change any element of the right or seeking to lease the water through the water bank. Although I am sure this letter is unnecessary and the Department would notify Farmers of any proposed action by the water right owner described above, my client is very concerned about the effect of anything that would remove the water from the Farmers canal without notice and an opportunity to comment on any such proposal. Therefore, please consider this letter a formal request that Farmers be notified of any application or request pertaining to water right 63-123F. I appreciate your time and consideration.

Sincerely,

Jerry A. Kiser  
Attorney at Law
