RE: Permit No. 22-13624
Request for Extension of Time to File Proof of Beneficial Use
River Rim Ranch Potable Water Supply System

Dear Darla:

Attached is a completed request for a five (5) year extension of time, \$50.00 filing fee and supporting information related to Water Right Permit 22-13624 that provides the ground water supply source to the River Rim Ranch development located in Sections 5, 6, 7 through 10 and 29 of Township 6N and Range 44E in Teton County, Idaho.

As noted in the application, the majority of the water system associated with this permit has been completed including the wells, storage tank, booster pump station, and majority of the distribution system. Estimated replacement cost (excluding engineering, permitting and administrative costs) for these completed facilities is approximately \$ 2,850,000 as detailed in the attached information.

The attached map shows the areas of use on the current system and where service connections currently exist. A total of 222 service connections out of the anticipated 334 connections have been completed at this time. Left to be completed are service connections to residential Tracts A, B and D which account for an estimated additional 109 services. There are also additional service connections anticipated for the golf village area (Tract E) as noted. Specific plans and layouts for these tracts are still being developed and therefore we are requesting additional time so that these uses can also be included with this water right as originally intended.

Please do not hesitate to call if you have any questions or need additional information.

Sincerely,

Robert T. Ablondi
Idaho P.E. 5994
