Cody,

For 74-07330 and possible duplicates 74-10600 and 74-14963.

The attached map shows the old inventory information we have with subwatersheds and then sites numbered within the subwatershed. The last 2 or 3 digits of the Forest Service ID number on some water right partial decrees is that map number.

74-10600 is map number 050, shown on the map in Section 11 as 13-050. It appears to stand on its own and would not be a duplicate or overlap.

Map number 076 for North Spring is common to permit 74-07330 and partial decree 74-14963. Based on priority date reflecting first use and as we discussed a couple days ago, the decree with the 1876 priority date is for the beneficial use still occurring at the actual spring. Permit 74-07330 for the headbox and trough installed in 1994 should still be able to proceed to license.

Hopefully the attached map and photo will help with the information you might need.

If you have additional questions about this matter please contact me.

Subject: RE: Basin 74 & 75 Permits

Steve,

I attached a list of permits I have come across that I have had the duplicate question on. Some of these may be duplicates while some may just be additional troughs that are in the same QQ. Any insight you could provide would be helpful.
