

Permit No. 74-7329

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
Staff Analysis Field Report for Exempted Permits

1. X Copy of Permit
2. X Copy of proof of beneficial use
3. X Copies of amendments, orders with conditions
4. X Permit is for one owner
5. X Confirm one owner of the place of use
X Tax lot Research
6. X Aerial photo of parcel for the water right file (copy of aerial required)
7. Well driller's report
8. X Stockwater use only
9. X 0.04 cfs or less on water permit
10. X Check if alternative source of water is available for use:

WR # 74-14962 is the right for the spring, and 74-7329 is for the trough and headbox. The trough is located approximately 350ft below the spring.

11. X Other information:

Volume Calculation:

1200 Range Cattle * 12 gpd * 122 days of use = 1,756,800 gallons or 5.39 AF

Rounded up to the nearest tenth = 5.4 AF

Aerial Photo #: Date :

Description of Improvements: Pipe length, Trough Dimensions, Dam height/length, Ac./ft.

Headbox consists of 1 1/2' dia. galvanized pipe w/ pipe head 9" below current H₂O table. Pipe is 1" pvc and extends 334' to trough. Trough is 12' x 3' x 2' fiberglass; Enclosure is 1/10-1/10 ac. w/ 5-strand barbed wire fence.

Remarks: Trough is functioning and in good condition. Supporting posts are solid, ^{overflow} drain is buried pipe extending down slope into next enclosure to prevent bog around trough. * 2nd spring w/ in lower enclosure doubles flow of stream - little sign of livestock, primarily big game. Healthy riparian, however willow dying + Ribes sp. replacing.

Flow: GPM / CFS

Subject: Possible duplicates 74-07329 & 74-14962
Attachments: 74-07329 Trough.jpg

Cody,

It appears that the information you have that I see on the spreadsheet is correct - that the POD for both these water rights is in the SWSW. With this in mind, the POD for 74-07329 needs to be corrected and changed to the SWSW. How is the best way to do this considering the procedural stage we're in with the Proof of Beneficial Use having been filed?

Then, decree 74-14962 is for the historically established beneficial use at the spring and 74-07329 would be for the trough and headbox installed pursuant to the application and permit, the trough being approximately 350 feet below the spring.

You mention that you had already received site visit information from the Forest. That information may have included the photo and information on the attachment to this message.

After you've had time to evaluate this situation please let me know if you need additional information from me and how you would like to proceed.

Thank you.

RE: Water Right Permit No. 74-07329

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

 X Point(s) of Diversion

 Place(s) of Use

 Other

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 30 days.

If you have any questions, please call me at 208-525-7161.

Sincerely,

Cody Allen
Water Resources Agent
