

MEMORANDUM

Date: March 19, 2012
To: Water Right File 84-7277
From: cpalmer
Re: Licensing Memo

PD: The point of diversion is a spring that is near the home. The right holder stated that this right is meant to supplement existing water right 84-7177. It seems that the rights are from two different springs because 84-7177 has a gravity flow system and 84-7277 has a pump on its system.

POU: Both 84-7177 and 84-7277 both serve the same home.

Volume: The right will be issued with 1.2 af annually and limited with 84-7177 based on the duty of water.

Ownership: According to county records a different owner now owns the POU. An ownership change form will be sent to new owner along with a copy of the license.
