

MEMORANDUM

Date: March 20, 2012
To: Water Right File 63-10770
From: cpalmer
Re: Licensing Memo

PD: This right diverts wastewater that discharges into a pond and the right holder has a pump in the pond to disperse the water. There are no overlapping rights in regard to the PD.

POU: The place of use was permitted for 40 acres. However, it appears that the POU consists of nearly 48 acres based on measurements that I took in ArcMap. Gov Lot 2 (POU) is made up of nearly 45 acres. By the time you subtract out the home in that QQ, there's still more than 40 acres that are being irrigated in Gov Lot 2 only (NWNE). Since the NWNE was part of the permitted POU, this right will include acres in that QQ only. The applicant will need to file a new permit to cover lands in the NENW.

In addition to the wastewater, Wilder Irrigation District water is provided for the POU.

Volume and Diversion Rate: The volume and diversion rate will be licensed as recommended by the field examiner.
