

MEMORANDUM

Date: March 16, 2012
To: Water Right File 65-13740
From: cpalmer
Re: Licensing Memo

PD: This right is for on-stream storage. There is a check dam at the outlet of the pond which is where the PD is located.

POU: The pond that is associated with this right is 0.2 acres in size and has a depth of 5ft pursuant to the field examiners finding. There are no other rights that overlap this right.

Volume: $0.2 \text{ acres} \times 5\text{ft} \times 0.60$ (to account for sloped sides) = 0.6 af capacity. The remaining 0.4 af will be used for seepage and evaporation.

Measuring Device: The measuring devices required by the permit have been waived by order.
