Re: Conversation with Jack McCall Concerning Field Visit for Permits 47-8087 & 47-8088

After repeated attempts to contact Mr. McCall by phone I mailed a letter to him requesting a field visit to clarify several issues that were unclear on field exams conducted in July of 1989. He called me as requested in the letter and informed me that he had "cooperated with the department and its requirements fully back in 1989 and that if we didn't have enough information then it was our problem." I told him that revisiting sites for additional information was common and that revisiting the site was in his best interest as it would allow us to actually license the permits in question. He responded by repeating the above and added that "the only interest the Department has is in stealing my water." I then asked if he would reconsider and again he repeated his first statement and ended the call.
