Mike:

Per your request about public records not yet scanned to some application files, please see the attached "wildlife summary 2007." I believe the cover page is scanned in the applications, but the remaining pages have not been scanned to all (any?) of those files yet. Note this document reflects department views at that time. Some of those views might be outdated now.

I also attached a 2012 summary table of approved permits and pending applications for wildlife projects in the lower portion of the Boise River drainage. Note that 63-32465 in the 2007 information was split and approved as 63-32911 and 63-32912 as listed in the current table.

Because some of these applications are protested, I copied the other parties c/o their attorneys for those protested applications. Also included by copy is SPF Water Engineering (Lori Graves) from one or more of the files.

Regarding protest questions at this time, the department has not yet determined a time frame to address those but anticipates progress by this summer.

Steve Lester
Water Rights Supervisor
IDWR Western Region
