Re: Water right 36-2146 transfer

Dear Mr. Merritt:

The owners of water right 36-2146 desires to drill a new well for irrigation purposes. Water right 36-2146 is located in Jerome County at Township 10 South Range 21 East Section 17 of the Boise Meridian.

The current well is not providing sufficient irrigation water to fulfill the water right. The proposed well will be drilled and both wells will be used to provide irrigation water for 36-2146.

This transfer proposes no change in ownership, beneficial use, period of use or place of use.

If the proposed well provides sufficient water when pump tested, the current well's motor and pump will be moved to the proposed well to reduce construction costs. The current well will be abandoned in accordance with IDWR standards. IDWR will be informed of decision to abandon the current well after the pump test has been performed on the proposed well.

It is requested that IDWR not advertise this transfer due to transfer only adding a POD to the existing water right. The owners of the water right would like to have the proposed well ready for production as soon as possible.

Please copy our office on all correspondence regarding this application.

Sincerely,

Greg Sullivan, M.S., E.I.T.
