Subject: Water Supply Bank Lease for Telford Lands LLC

Dear Mr. Trotten,

We have received a Water Supply Bank lease application on water rights 34-618, 34-2330B, 34-7077, 34-7080B, 34-7092, 34-7121A, 34-7121B, 34-7179, 34-12376, 34-13659, 34-13661, 34-13840, and 34-13842. When combined these water rights allow the irrigation of 2,124 acres within a 2124 acre permissible place of use. The lease application requests that 267.7 acres of the 2,124 acres allowed by the water rights to be placed in the Water Supply Bank. If the Water Supply Bank is approved, Telford Lands LLC will not be allowed to irrigate more than 1,847.3 acres within the 2,124 acre permissible place of use.

These leases were received in 2009, so our review of the water rights was based on the date the applications were received. I have attached two maps that use the 2009 aerial photography that is available. The "telford lands map" is a map submitted by the applicant showing the acres they plan to retire. The "Teleford 34 map" is map the department created to confirm the acres involved. On the "Teleford 34 map", the yellow outline shows the acres irrigated in 2009, and the green outline shows the boundary for the water right's permissible place of use.

If you have any questions, please don't hesitate to contact me.

Respectfully,

Daniel A. Nelson

Roger,

I sent this email concerning a water supply bank lease today. It had two map attachments, so I wanted to make sure you received the email. Please let me know if you got the email.

Thank You
