Attachments: DOC014.pdf

Kevin,

The memo is attached.

Basically, there was a transfer approved in the past which changed right 37-865A from an irrigation right of 51.4 acres to diversion to storage and ground water recharge from storage for a large pond. (Accompanying permit 37-8894 was originally going to be groundwater recharge and groundwater recharge from storage to satisfy the storage components of 37-865A. That project and a proposed dairy fell through but they still wanted a smaller pond for aesthetic and wildlife so they amended 37-8894 to cover the storage component for the smaller pond in this transfer.) This transfer allows for a 4-acre pond and converts the remaining 47.4 acres back to irrigation under 37-865A and also shuffles the acres around under 37-865B. Feel free to call if you have more questions.

Jeanie
