10. Remarks:

Shoupe Store and Cafe currently uses water from Boulder Creek for non-potable water. Potable water is imported for use in the restaurant. Because of concerns about using surface water for commercial use Idaho Department of Environmental Quality (IDEQ) has required the Shoupe Store to install a well that conforms to the standards for public water supplies. Because of these concerns and site constraints Carlin Feisthamel, Water Quality Engineer for IDEQ, assisted in selecting a well site for the Shoupe Store. The site is located on National Forest System land authorized and operated under a special use permit. The water right permit will be obtained by the USDA Forest Service.
