Greg,

I have just begun reviewing the submitted application & will send correspondence soon identifying questions &/or discrepancies. The submitted distribution system map doesn't show how the surface water rights are delivered to the integrated system. Please add this portion of the distribution system to your map & resubmit.

Pam,

I have attached an aerial map of the proposed PPU and the current main line configuration. I am still working on the ownership split of the water rights between the partners as described in the ownership and managment agreement.
