Pam,

I have reviewed your letter and I am currently working to address each of your concerns.

I have talked with the mortgage holder and we are getting the consent form prepared.

Can you explain why and from witch water rights the additional $150.00 is required? I will be submitting the ownership split form into the Southern office soon and I think this may take care of this additional fee. I will also submit a copy to you.

* I have attached to this email a map of the collection and main line delivery system for the PPU.

Can you explain more on your suggested change for 45-690? The only characteristic of this water right that is proposed to be changed is to change the PPU that it is included in. The irrigation and stock water limits and conditions were approved by IDWR in a previous transfer that established the current PPU.

I am currently trying to track down information from the Burley Irrigation District concerning the amount of water delivered to property and water rights included in this transfer. Water right 45-7317 is the only water right that is supplemental. There is 102.0 acres of water that was decreed on the North side of the canal and it is this 102.0 acres that is considered supplemental. The Burley Irrigation District covers all farm ground in this area that is on the North side of the canal. The Burley Irrigation District does not have shares assigned to QQ within the coverage area. When I receive the annual delivery records, I will forward them to you.

Greg,

I have sent the attached letter out In the mail, but wanted to provide you with an electronic copy now. Please review the areas that require some additional attention & let me know if you have any questions related to any of the items.

Pam

* Distribution map submitted included in application. GS
