RE: Application 65-23471 Review Checklist

For unknown reasons, the review checklist for this application is missing. The following summary confirms proper processing in the absence of the checklist.

1. Comment letters sent to Watermaster, IDFG and SO Planning.
2. Only Planning replied, resulting in conditions about minimum stream flow (65-12733) and not diverting more than 0.04 cfs or obstructing flow of water (state protected recreational reach of river).
3. Legal notice successfully published per approved affidavit.
4. No protests.
5. No petition to reconsider approved permit.
