RE: Permit No. 78-7346 and location of well

Dear Mr. and Mrs. Williams:

I am completing my review of your water right file 78-7346 and I hope to be able to issue a license for your heating use by the end of the month. I am writing this letter to request a clarification from you.

None of the IDWR databases has an accurate location for the geothermal well which is the point of diversion for this permit. IDWR personnel will be in the area in March and could take GPS coordinates for points of diversion, such as this well, but I would prefer to conclude the licensing review before then.

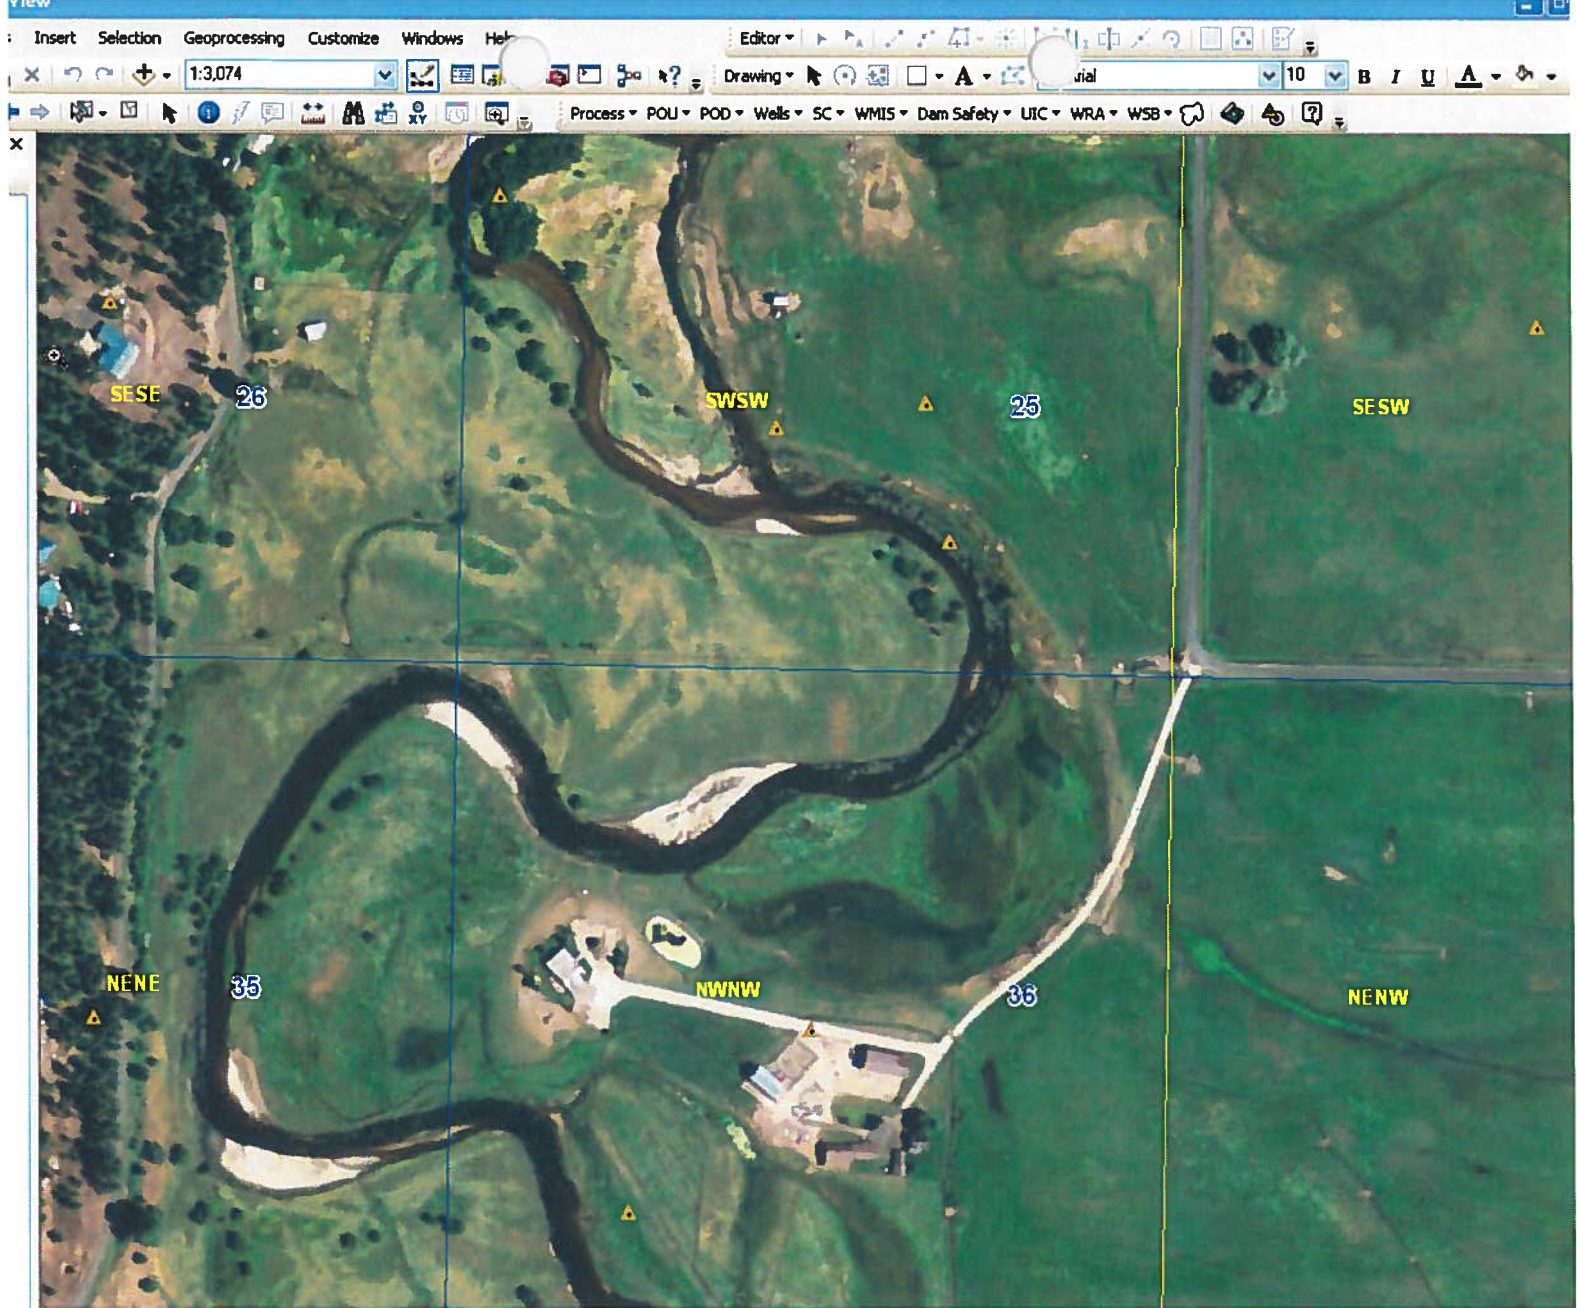

I have enclosed a color printout showing IDWR database information superimposed upon aerial photography of your part of the world. You should recognize your property. The small orange triangle shapes are IDWR symbols indicating the points-of-diversion for various water rights. There are 4 orange triangles in the SWSW of section 25 which is the legal address for your pump house. However, none of those triangles appears to be the pump house for your geothermal well.

Please indicate on the printout, the location of your geothermal well and either mail it back to me at the address in the letterhead above or FAX it back to me at 208-287-6700.

Thank you for your continued patience. If you have any questions, please call me at 208-287-4946, or email me at [michele.edl@idwr.idaho.gov](mailto:michele.edl@idwr.idaho.gov).

Respectfully,

Michele Edl  
Associate Engineer
