Hello Bob and Jon,

Thank you very much for your earlier email(s). I've reviewed Bob's memo dated 11/3/2011 that requests the full permitted diversion rate of 1.10 cfs. In addition, I am made aware through the memo that 725 individual, residential uses currently exist at Teton Springs. Unfortunately, while Teton Springs may have developed 725 residential uses, permit 22-13178 is limited to 710 residences total which is based on the number of residence that were on your application for permit. Further, the number of residential uses is also limited to the amount of residences that were actually stubbed-in as of August 2006 (beneficial use due date).

I realize that this has been a long process and am hopefully that we will reach a resolution for permit 22-13178 very soon. I would like to cover Teton Springs' water use as completely as possible and will need more information if you feel that I have unduly shorted Teton Springs on diversion rate, volume, and/or number of residences. Please provide similar information that you had previously submitted (see attachments DOC004 and DOC005--proves 581 water connections were in place) that demonstrates that an additional 129 residences have been stubbed-in as of August 2006. DOC006 is a table that I created that summarizes which lots are already covered.

In any case, a new application for amendment of permit will be required since the most recent amendment reflected 575 residences rather than 581. I have created a new application for amendment of permit for 581 individual residences. The corresponding volume would be: 581 residences x 0.6 af (IDWR standard) = 348.6 af. The diversion rate will still be 1.0 cfs.

If you have further information to submit, you may send me the information within 30 days. If the stub(s) for the additional 129 residences were developed after August 2006, please sign and return the attached amendment and file a new application for permit to cover the 129 residences with a new permit. Please note that I will need to have a signed amendment that is sent by mail as I need an original signed document.

Thank you again for your attentiveness and look forward to hearing back.

Sincerely

Cherie Palmer, Sr. Water Resource Agent Idaho Dept of Water Resources Water Allocation Bureau
