Subject: Reading Water Bank Application

Dan,

I opened headgate to Reading ground,.4CFS,the morning of 10-12-2011.I closed the same headgate the evening of 10-13-2011 because .4CFS was not going to reach the Reading ground. *At that time I informed Mr.Reading that he needed to clean his ditch,never the less,20 inches would not reach the Reading field before it all sank,even with a clean ditch.Mr.Reading called for his water to irrigate his field.*

Respectfully
Roger Totten
