Dear Ms. Graves:

I am writing with regards to the irrigation wells on our farm (Permit No. 63-11336) and scheduling a field examination for proof of beneficial use for irrigation of 80 acres with these wells.

The south well previously produced a much larger quantity of water than it does now. We have been in consultation with Riverside, Inc., who videoed, cleaned and baled this well to try to improve the flow. Everyone agrees at this point that unless we drill deeper, with no guarantees, we have done about all possible to improve the flow and are now ready for you to conduct a field approval of the wells.

Thank you for your consideration and help in this matter. You can reach me by calling 208-459-7017 or writing to the above address.

Sincerely,

Carolyn Martell
Farm Manager
