RE: Application for Permit No. 74-15702

Dear Mr. Loft:

It was a pleasure speaking with you on the telephone the other day. As we discussed I am sending you an amended application for permit. This amended application changes the source of water to wastewater, the amount of water to .01cfs, and reduces the irrigated acreage to one half acre.

If everything looks alright please sign the amended application and return. Since this application has not been advertised yet, no additional money is required.

If you have any questions please let me know.

Sincerely,

Kerrie Mathews
Water Resource Agent

RE: Application for Permit No. 74-15702

Dear Mr. Loft:

On December 28, 2011, I sent you an email regarding an application that was submitted to the Department in 2006. In June of 2011 you sent an email to the Department stating that the point of diversion, place of use and source of water had changed from the originally submitted application.

In order to continue processing your request I need more information. I am enclosing a map, could you please take a moment and mark the point of diversion and the place of use? In addition could you please describe the proposed diverting works, (type and size of devices used to divert water from the source)?

Once this information is received, I can prepare an amended application for your review. If you have any questions please let me know.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Kerrie Mathews'.

Subject: Application to Appropriate water Upper Salmon River Basin 74-15702

I hope that this suffices in lieu of a "hard" copy letter referring to the application filed in 2006.

The original intent of this acreage(5) was to provide habitat for upland game. Working with the local office of Fish and Game, a number of shrubs, trees and other plants were donated for this endeavor. However, the high cost of fuel coupled with the logistics of irrigation eliminated the original intent.

Now, irrigation is limited to a "tree line" adjoining the property to the East of this acreage. The amount of land irrigated is limited to 2' (feet) x 900' (feet).

The source of the water for this endeavor, is from a irrigation runoff from the adjoining field. I have received verbal approval for the use of this runoff from the land owner and holder of the water right. It should be noted, that this water is not taken from the point of diversion described in the original application.

This aforementioned "tree line" now provides winter habitat for the upland game.

If there are any lingering questions, please feel free to contact me via "e-mail" or phone.

Respectfully,

Terry Loft
