

MEMORANDUM

Date: January 18, 2012
To: Water Right File 2-7226
From: cpalmer
Re: Licensing Memo

PD: There is one point of diversion associated with this right. I have confirmed that the following rights also divert from that PD as well; 2-2040, 2-2041, 2-4032, 2-10335, and 2-10336. The capacity of the well at the time of the field exam is 1.70 cfs. *No overlapping conditions will apply - See attached Spreadsheet*

POU: The place of use as recommend by the field examiner encompasses 53 acres. However, the acres located in Section 1 are fully covered by decreed rights 2-10335 and 2-10336. Right 2-7226 adds no added benefit to lands that are already covered by 2-10335 and 2-10336. Right 2-7226 will only cover lands in Section 6 that are not covered by any other water rights.

The final actions of adjudication has changed the disposition of many rights associated with this right since the field examiner wrote up her recommendations and most of the rights referenced in her report have since been split and/or are appurtenant to different lands. The attached split tree and map clarifies the current disposition of Rockin S Ranch rights.

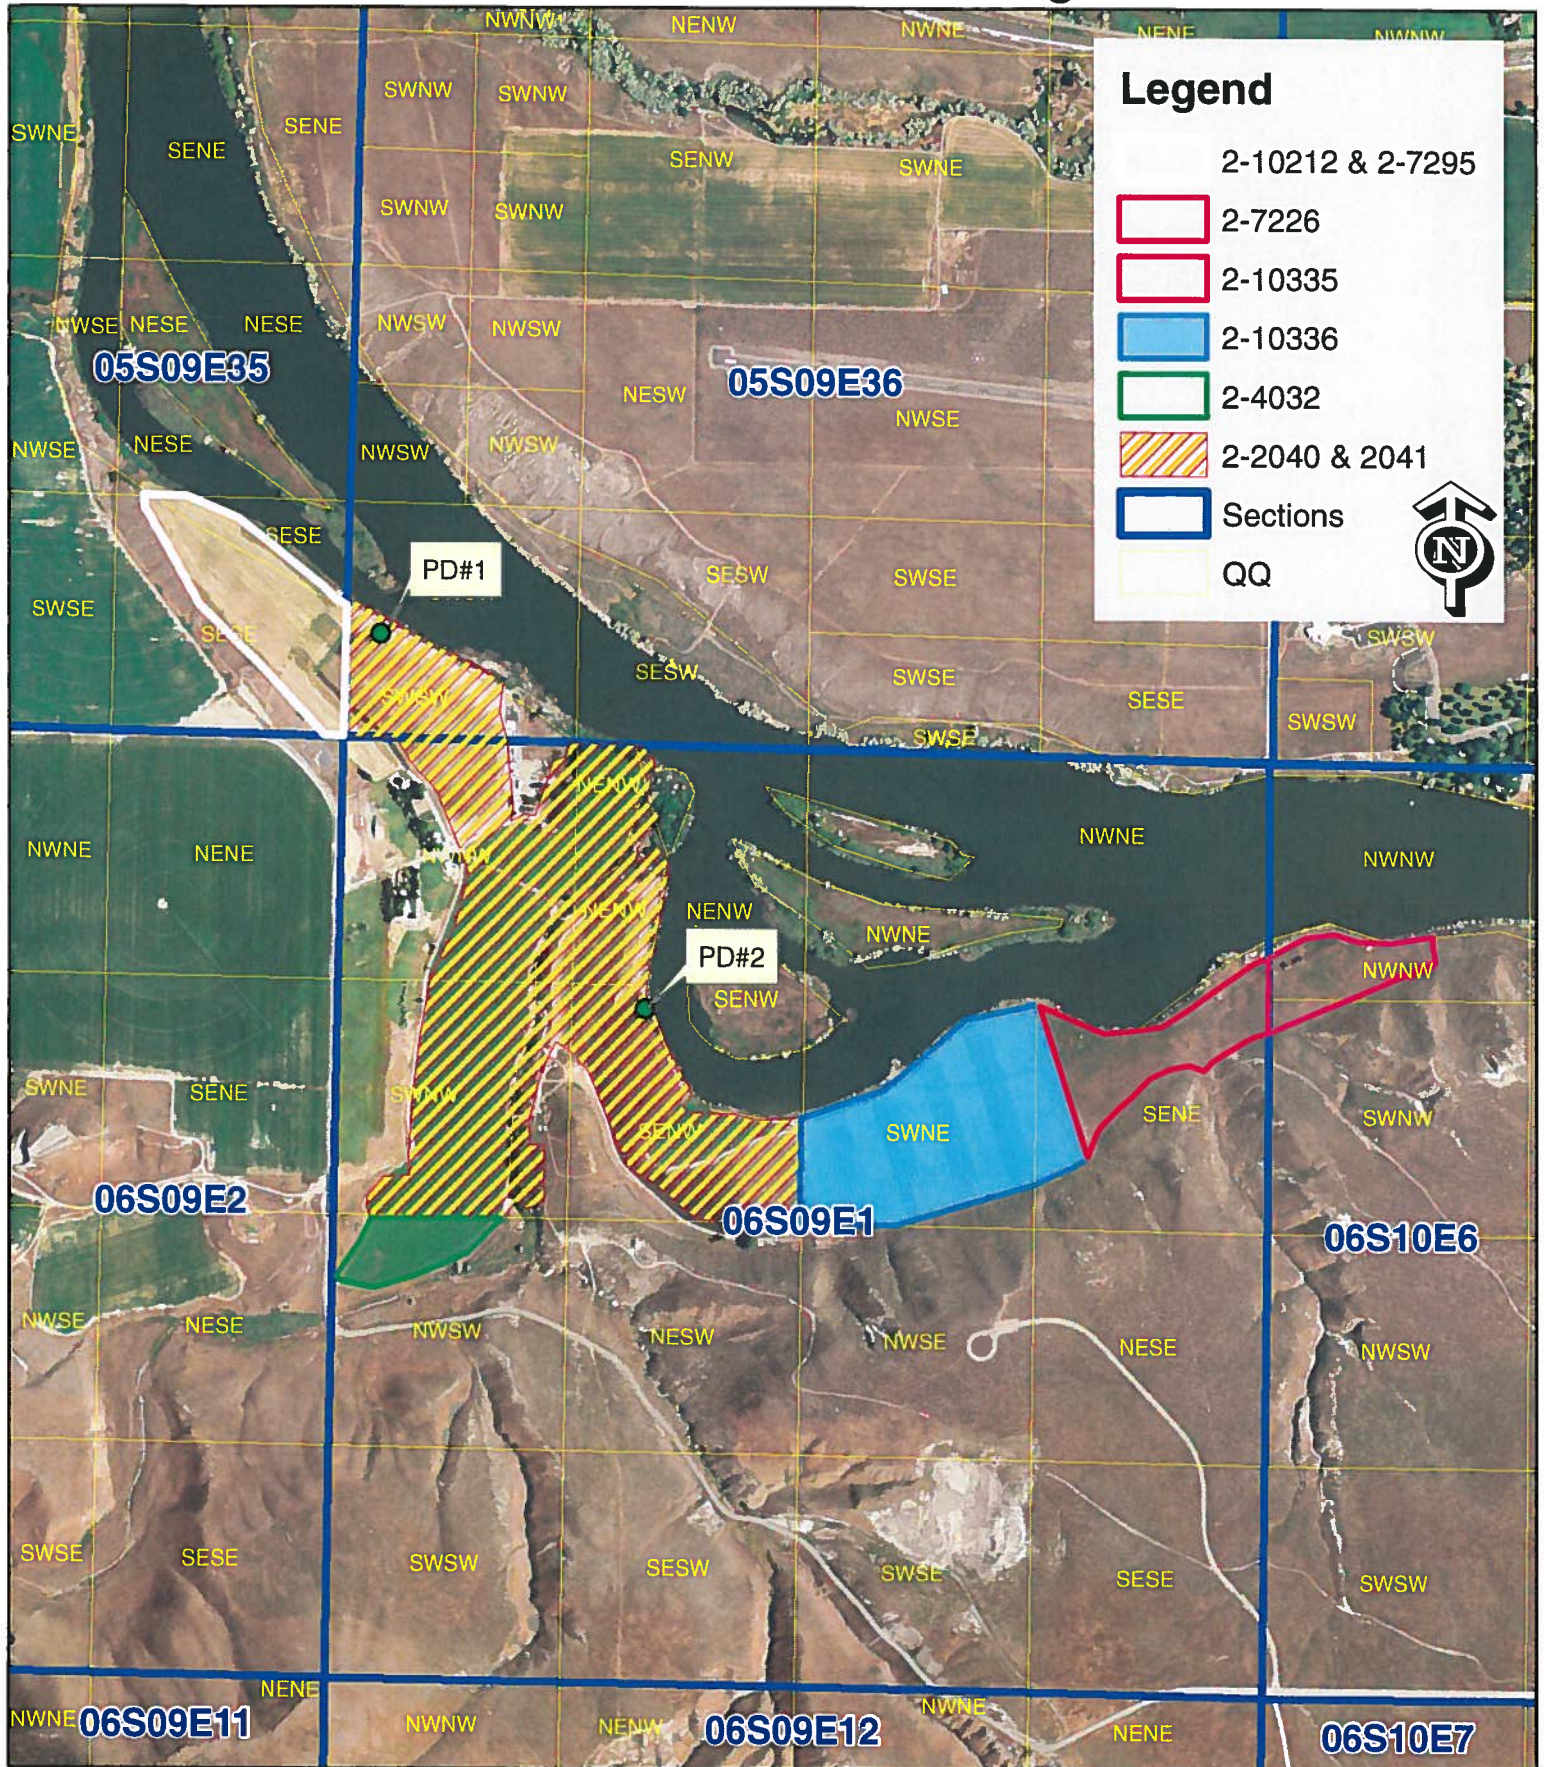

OVERLAPS: See map

CONDITIONS: An order was issued to modify the measuring device condition to say that "...install a measuring device or provide a certified measurement by a professional engineer, or install and access port of other device as specified..." The field examiner did not find a measuring device and it doesn't appear that any measurement data was submitted by the right holder but the field examiner was able to obtain a measurement using a polysonic. I am not sure if this qualifies as an access port but the purpose of the condition is to insure the capability of obtaining a measurement and that has been completed.

SEASON OF USE: The season has been update to reflect current standards

Amendment Required to update PD and POU.

Rockin S Ranch Water Rights

Rockin Ranch Rights WR#	Diverts From		CFS
	PD#1	PD#2	Diversion Rate
2040 x		x	1.8
2041 x		x	0.9
10335		x	0.14
10336		x	0.46
10212 x			0.2
7226		x	0.12
7295 x			0.13
4032		x	0.2
Total	3.03	3.62	3.95

The capacity of PD#1 is 1.70 cfs

The capacity of PD#2 is 3.26 cfs

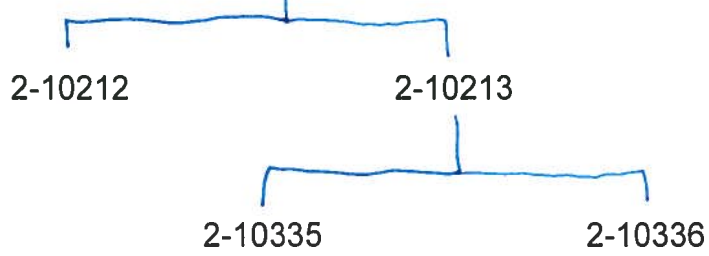

PD #1 may divert up to 3.03 cfs which is < the total capacity of 3.26 cfs--> No combined limit necessary

PD #2 may divert anywhere between 0.92 cfs to 3.62 cfs (2040/2041 can divert from either two PDs)

No combined limits will be added to license for 7226 since the limit would unduly limit overlapping rights

*Conclusion: Newly licensed right 2-7226 and 2-7295
will not include any PD combined limits.*

$$2-2016 + 2-4019 = 2-10022$$
