

MEMORANDUM

Date: January 31, 2012
To: Water Right File 41-7083
From: cpalmer
Re: Licensing Memo

POU: The field examiner found the full 8 acres being irrigated during her field visit. Even though the land she outlines in her report may have been irrigated during her field visit, the acres that are now being irrigated look much different. A new shape has been created that reflect current irrigation practices and also equals 8 acres.

PD: There is one well that supplies the irrigation, stockwater, and domestic water.

OVERLAPS: There are no rights besides 41-7083 that are appurtenant to the POU or use the PD.
