Subject: RE: Watermaster Comment Request - Permit 65-23169 - George Logan

Mr. Saxton,

I have spoken with Mr. Logan in regard to waiving the requirement for a locking device on his irrigation system under Water Right No. 65-23169. I apologize for not getting a letter out to you before this time.

I am willing to waive the requirements under Condition 7 at this time for a locking device and a measuring device, with the stipulation to invoke these conditions in the future if the Department of Water Resources or the Watermaster find it necessary.

Mr. Logan has agreed to keep a record of run times and supply me with a calculated diversion rate for water accounting each season. However I believe it would be in his best interest to install proper and permanent system that will fulfill the conditions of a locking device and measuring device as soon as he is able.

Thank you for your attention to this matter.

Sincerely,

Ron Shurtleff

Subject: Watermaster Comment Request - Permit 65-23169 - George Logan

Hello Mr. Shurtleff,

I received a request to remove the requirement for installation of a measuring device and lockable controlling works as described in condition #7 of permit 65-23169. The permit holder George Logan, stated in a letter that he spoke with you about this request (attached).

I wanted to confirm with you that you were aware of Mr. Logan's system and that you agreed with the removal or modification of condition number 7. Could you speak to both the measuring device requirement and the lockable controlling works requirement.

Thanks for your time,

Respectfully,

Craig L. Saxton
