RE: Permit No. 65-23169, holder George J. Logan

Dear Ms. Block:

I talked to Mr. Ron Shurtleff, Water Master, about the Department's requirement of a water measuring device and a lockable controlling works on my property watering system in Crouch, Idaho.

Mr. Shurtleff advised me that because of my system of irrigation the locking device requirement could be waived.

I have a 2.5 horsepower portable electric pump that I use to pump water out of the river. I plug it into an RV electrical hookup when I do use it. Otherwise, the pump would be under water because of spring runoff.

You might say I have a "locking device" because when the pump is not in use by me or my help, it is locked up in storage and inoperable.

As for a measuring device, if it is required, it will be installed as the Department requires.

Sincerely,

George J. Logan
Property Owner
