www.idwr.idaho.gov/apps/ExtSearch/WRFilings.asp. The purpose of the transfer is to change a portion of the above rights as follows: Transfer proposes creating a 2,620.6 acre permissible place of use for fifteen Marsh Creek water rights and five ground water rights on property located approximately 4.0 - 6.25 miles east and 1.5 miles north - 2.0 miles south of Declo. The transfer also proposes to modify the authorized points of diversion of the fifteen Marsh Creek rights to reflect five locations where water is actually diverted from Marsh Creek. The transfer will also add an existing well, located approximately 5.3 miles east and 0.8 miles south of Declo, as an additional authorized diversion point for three of the groundwater rights (currently diverted from a combination of two existing wells located within the proposed permissible place of use). The recorded points of diversion for the two other groundwater rights, diverted from three wells (generally located along Marsh Creek, south of the proposed permissible place of use, but north and east of Albion) will be modified to reflect locations where ground water from the three wells is injected into and rediverted from Marsh Creek. In total, up to 88.64 cfs of water will be diverted from Marsh Creek via the fifteen Marsh Creek rights, and up to an additional 21.71 cfs of groundwater will be diverted via the five ground water rights to irrigate up to a combined total of 2,115.8 acres within the proposed 2,620.6 acre permissible place of use.
