

MEMORANDUM

Date: January 12, 2012
To: Transfer 77699 File – Manning Ranches
From: Jeanie Robertson
Re: Evaluation of Sufficiency of Information Submitted

This transfer moves the point of diversion for an irrigation right currently authorized for the diversion of 0.32 cfs and 64.0 af for the irrigation of 16 acres to a proposed new well to be drilled approximately 100 feet to the east on property owned by the applicant. (The current well for this right is located on a neighbors property and needs to be replaced so they intend to drill a new well on their property.) They have requested the full five years for completion of the transfer and well drilling. Location of the proposed new well is approximately 1.1 mile east of the center of Oakley just north of Main Street.

- **Authority to File:**
The application was submitted by and signed by Deanne Manning, widow of Robert Manning. She provided paperwork showing she is authorized to sign on behalf of Manning Ranches. Applicant stated that there were no lien holders on this particular piece of property.
- **Water Right Validity:**
45-4191A was decreed on 5/3/2007.
- **Injury to Other Water Rights:**
The place of use falls within the smooth model boundary of the ESPA so will be conditioned accordingly. It also is within the boundary of the Oakley Canal Company but the applicant stated there are no canal shares associated with this property and no way to get them there even if there were. The right is within WD140 so water master comments will be requested.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No negative impacts anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed irrigation use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
